THE MISSING LINK FOR THE SINK

# ScrapDrain™

SINK SOLIDS SEPARATOR

ScrapDrain is the sustainable sink guard for the modern kitchen. It separates waste scraps BEFORE they go down the drain with greater capacity and finer capture.

THE DEEP INTERNAL BASKET SEAMLESSLY STRAINS SOLIDS FOR EASY & TIDY TRANSFER.

Rinse & wash dishes as normal while ScrapDrain strains away the liquid, separates solids, and prepares a one-step transfer for **composting**, municipal pickup or a drop-off recycling program.

A BETTER WAY FOR TODAY

## ScrapDrain - simply a better way for today

### ENVIRONMENTAL & FUNCTIONAL BENEFITS WITH ScrapDrain:

- **IMPROVES** wastewater quality by reducing total suspended solids and FOG<sup>1</sup>
- **PREVENTS** scrap solids from causing clogs in drain lines & the sewer system
- **SIMPLIFIES** sink scrap collection & streamlines transfer to a compost option
- **DIVERTING** food waste from LANDFILL helps to reduce greenhouse gases
- **REPLACES** electric disposals with better solids prevention for SEPTIC systems
